

Guidelines for advancement to the national level of the TSA VEX Robotics Competition

The national level of the TSA VEX Robotics Competition will be held at the national TSA conference in Dallas, Texas. The conference dates are June 21-25, 2011.

The number of teams participating in the TSA VEX Robotics Competition event held during the national TSA conference is limited to one hundred (100) teams, with no more than five (5) teams per state.

Each participating TSA chapter may have a maximum of one (1) team compete in the VEX event at the national TSA conference. If there are multiple teams in the same chapter, then the chapter must select only one (1) team to represent the chapter at the national event. TSA teams qualify to advance to the national TSA VEX Robotics Competition event based on the priority below.

1. TSA teams that are winners or finalists at an official VEX Robotics Competition (VRC) tournament held at a TSA state conference
2. TSA teams that win 1st place at an official VRC tournament in their state, if their state has no TSA state conference
3. One (1) team per TSA chapter that competes in an official VRC tournament held at a state conference.
4. TSA teams that win 1st place at an official VRC tournament, who could have participated in (but chose not to do so) in an official VRC tournament at their TSA state conference
5. One (1) team per TSA chapter that competes in an official VRC tournament in the team's state if the state has no TSA state conference
6. TSA teams that win 1st place at an unofficial VRC tournament held at their TSA state conference
7. One team per TSA chapter in states that do not have a TSA state conference and do not have a reasonably accessible VRC tournament
8. One team per TSA chapter in states that have a TSA state conference, but do not have a VRC tournament at the conference
9. Non-TSA teams; limit one (1) team per school

Should space be available after all eligible teams have registered for the national TSA conference event, then more than five (5) teams per state (from a waitlist) may register. This includes non-TSA VEX teams [limit of one (1) team per school].
